+357 99 194 794

Limassol, Cyprus

Ambitious and energetic web developer with a strong desire to grow in the industry. I have independently learned HTML, CSS, and basic JavaScript, completing various online courses and practicing on personal projects. My portfolio projects showcase the result of my hard work. I am prepared to write functional code, solve problems, study and master new technologies, and consistently strive for excellence.

Professional Skills

- **HTML and CSS:** Proficient in creating responsive websites using the BEM methodology.
- **Layout Optimization:** Understanding of methods to speed up page loading and improve usability.
- **Accessibility:** Adhering to best practices to ensure every user can comfortably use the applications I create.
- **CSS Ecosystem:** Basic knowledge of preprocessors such as LESS, as well as frameworks like Tailwind CSS and Bootstrap.
- **JavaScript:** Having basic knowledge, currently practicing React and TypeScript to create modern web applications.
- **Version Control:** Ability to use Git for version control and collaboration on projects.
- **Communication:** Excellent communication skills, building professional relationships with colleagues and clients.
- **Responsibility and Organization:** High level of responsibility, effectively managing time and tasks to meet deadlines.
- **Continuous Learning:** Committed to self-improvement, actively seeking out new technologies and methodologies.
- **Language Skills:** English B1 proficiency.
